

TETHERED AEROSTATIC COMPLEX «LYNX»

- High effective twenty-four-hour video surveillance
- Border control
- Anti smuggling
- Electronic warfare
- Providing of various types of communication
- High quality broadcasting of the sport and public events
- Security service for the large objects
- High mobility
- Long endurance
- High reliability
- Wide range of payloads up to 155 kg
- Rapid deployment
- Compactness and economical compatibility

MOBILE AEROSTATIC COMPLEX «LINX»

Technical characteristics

Volume	450 m ³
Length	19 m
Maximum altitude	1000 m
Flight endurance	15 days
Payload	60 - 150 kg
Maximum wind speed at operating altitude	25 m/s
Maximum wind speed at mooring system	30 m/s
Power supply	3 kW
