

MOBILE AEROSTATIC COMPLEX «TIGER»

- Low-flying targets detection
- Border control
- Ground and marine targets detection and identification
- Electronic warfare and intelligence
- Providing of various types of communication
- Security service for the big sport and public events
- High mobility
- Long flight endurance
- High reliability
- Wide range of payloads up to 500 kg
- Rapid deployment

MOBILE AEROSTATIC COMPLEX «TIGER»

Technical characteristics

Volume	2670 m ³
Length	38,5 m
Maximum altitude	1500 m
Flight endurance	15 days
Payload	200 - 500 kg
Maximum wind speed at operating altitude	27 m/s
Maximum wind speed at mooring system	42 m/s
Power supply	5 kW
